

DUNAPARTI FEJLESZTÉSEK
DANUBE WATERFRONT EXPANSION

VÁROSTERVEZÉS_4 URBAN DESIGN_4
2000 - 2006

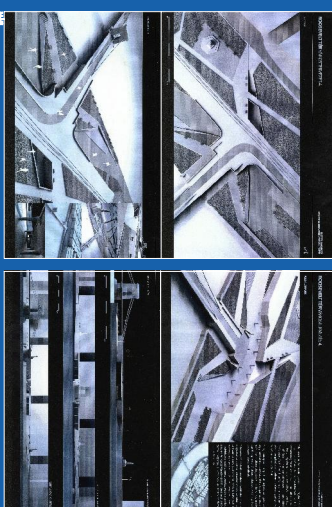

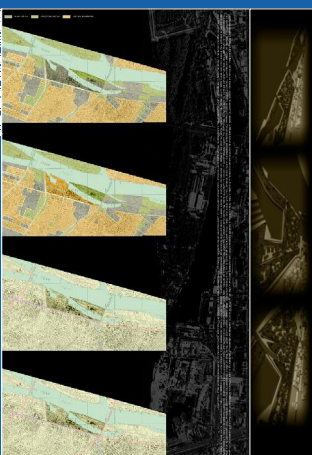

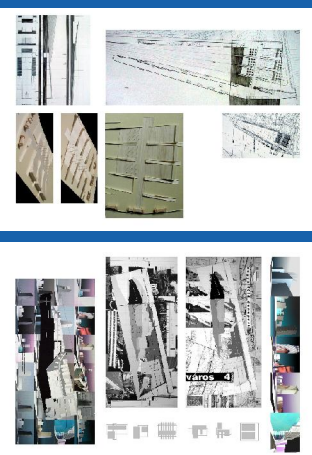

The task of the seminar is to prepare students for the design of urban scaled projects. Year by year we meet the students with actual and complex urban design problems of Budapest and its surrounding areas. The seminar has been well-attended since the first Danube Forum, here we allow a selection of new constructions, conversions and Danube promenades.

DUNASÉTÁNY DANUBE PROMENADE

The inner city hosts the most hectic and colourful social life. The inner core of the cities is in a continuous renewal in conjunction with changes in societies demands. Cultural and leisure activities are in expansion today, so inside the complex, re-think the use of the Danube embankments. Citizens should use the banks as a promenade instead of a parking area.
