

Touch the water

Neptune project 2007

Group 4

Conifer tree

- Located on the right side of the Danube, between the Elisabeth and Petöfi bridges.

Location of project sites

Current situation: Little open green space

Poor access due to flooding

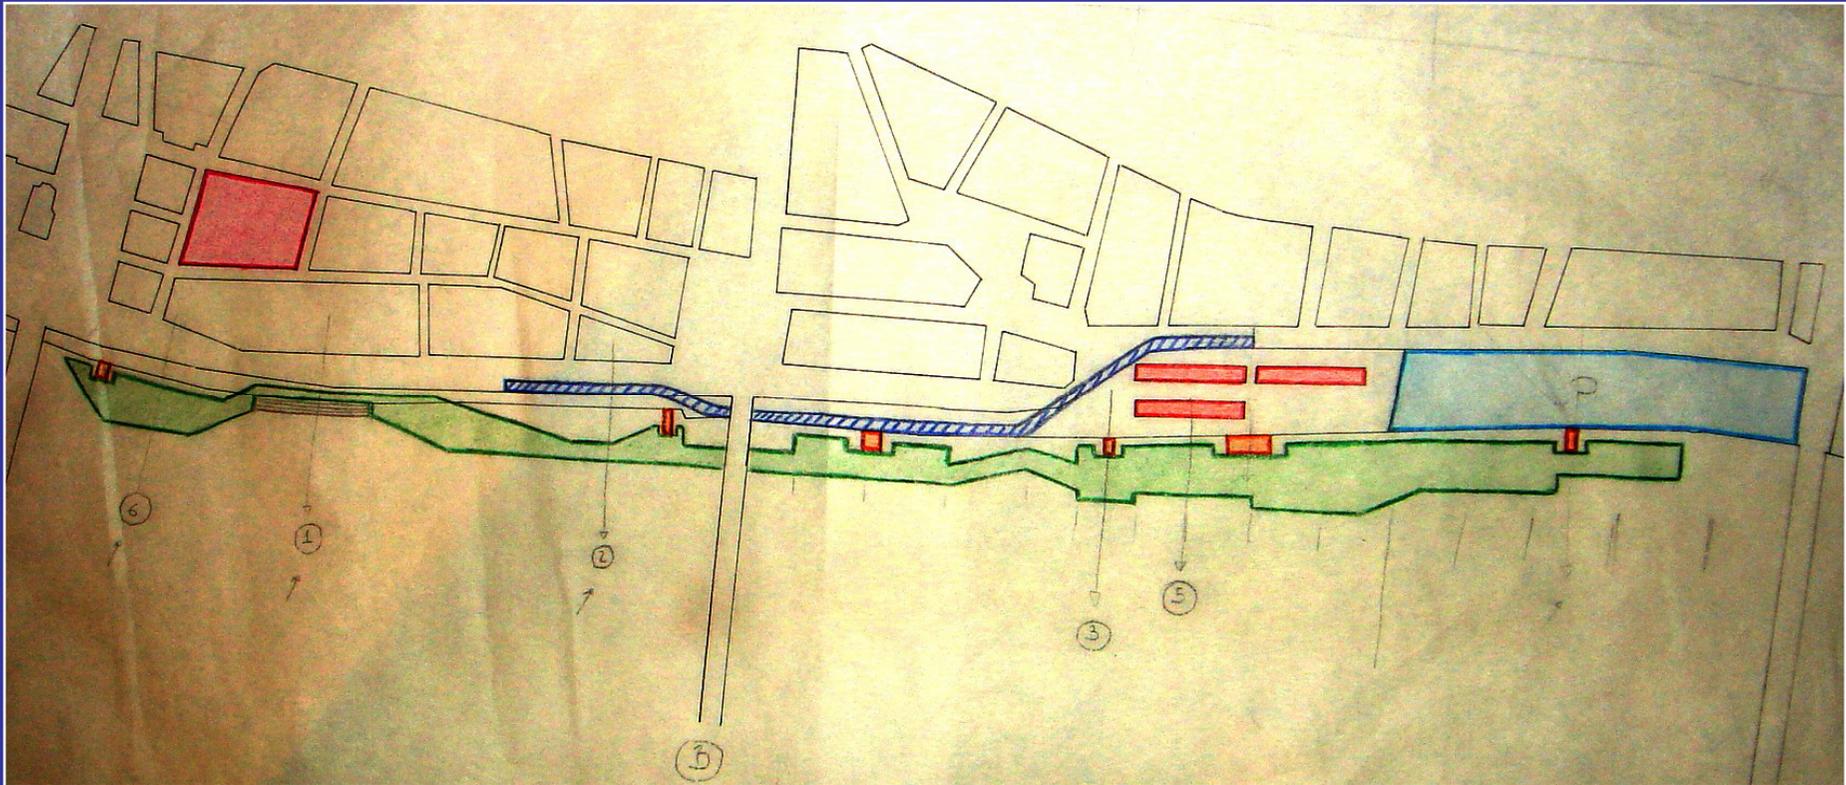

Undeveloped warehouse area

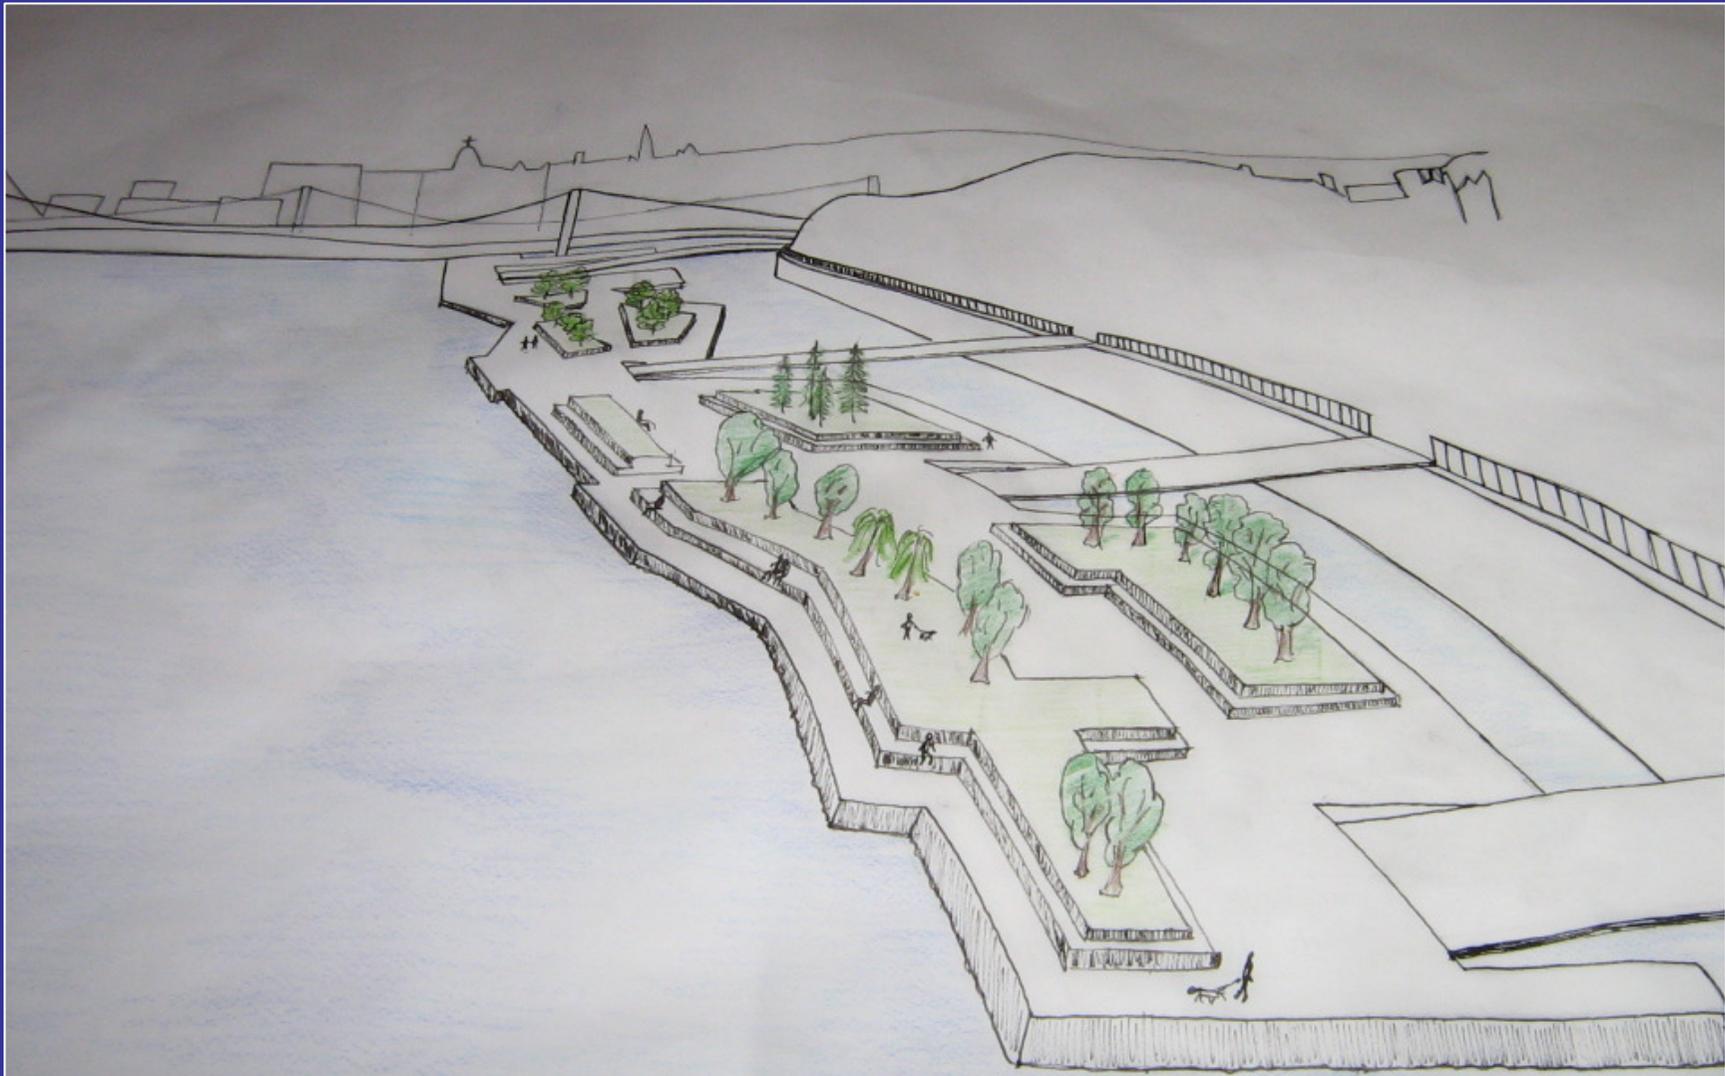

Poor parking

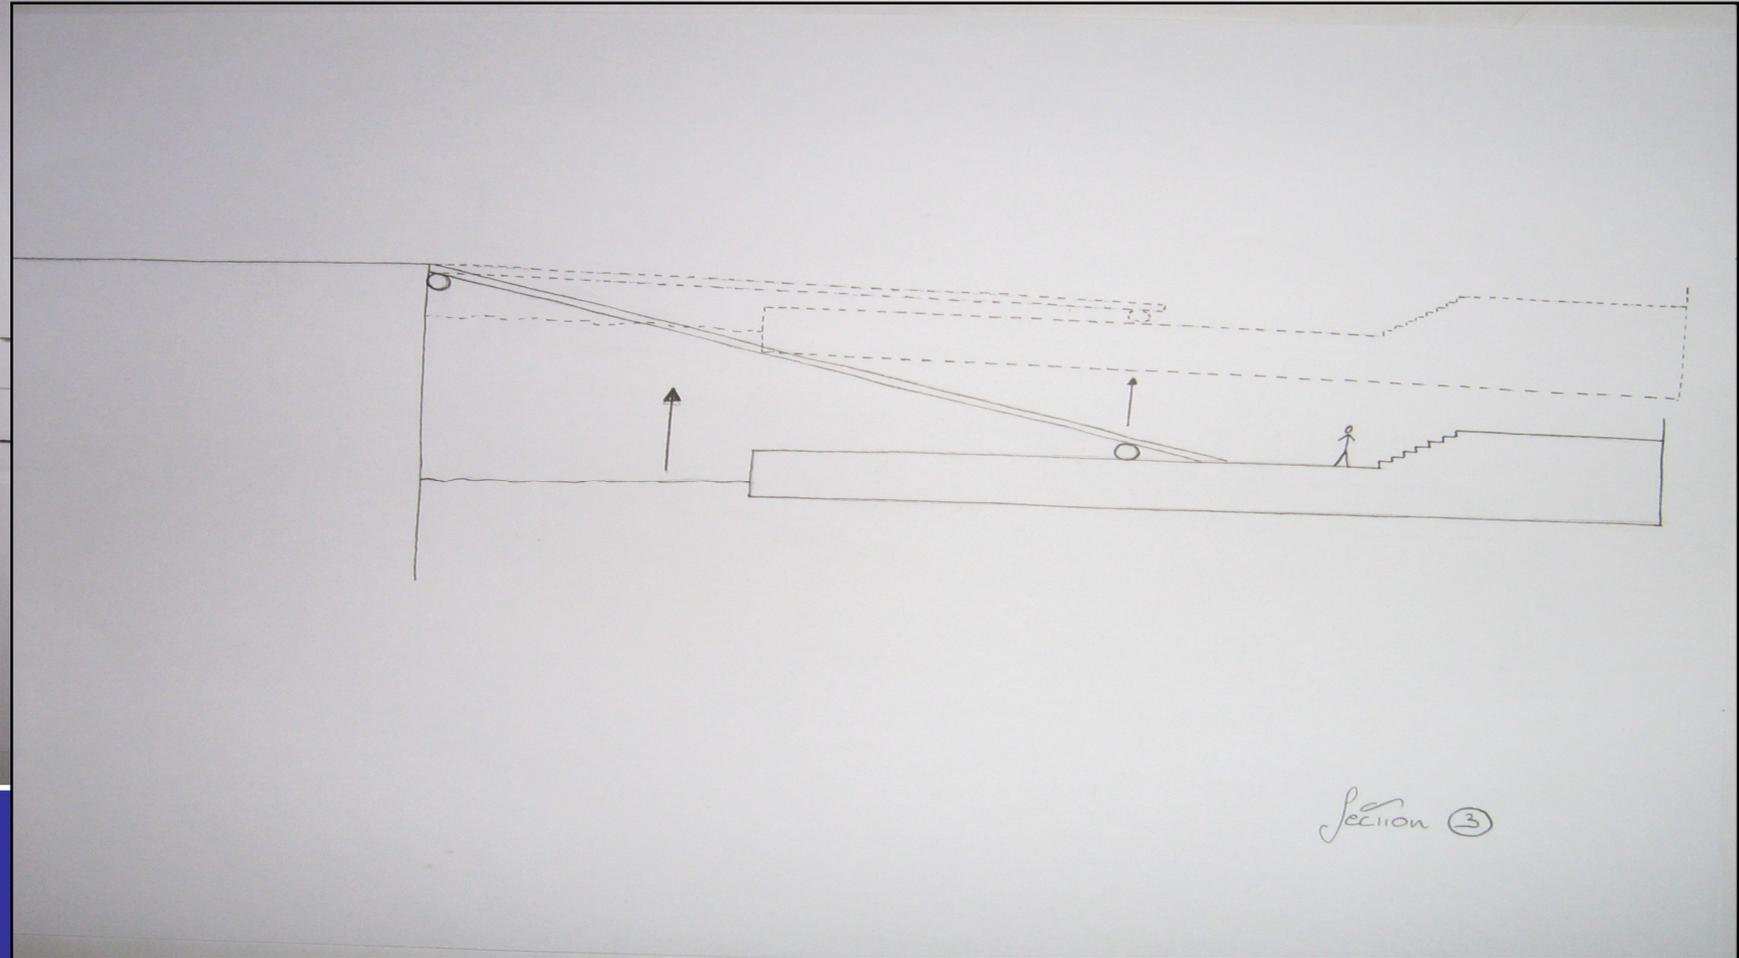

Plan of our designs

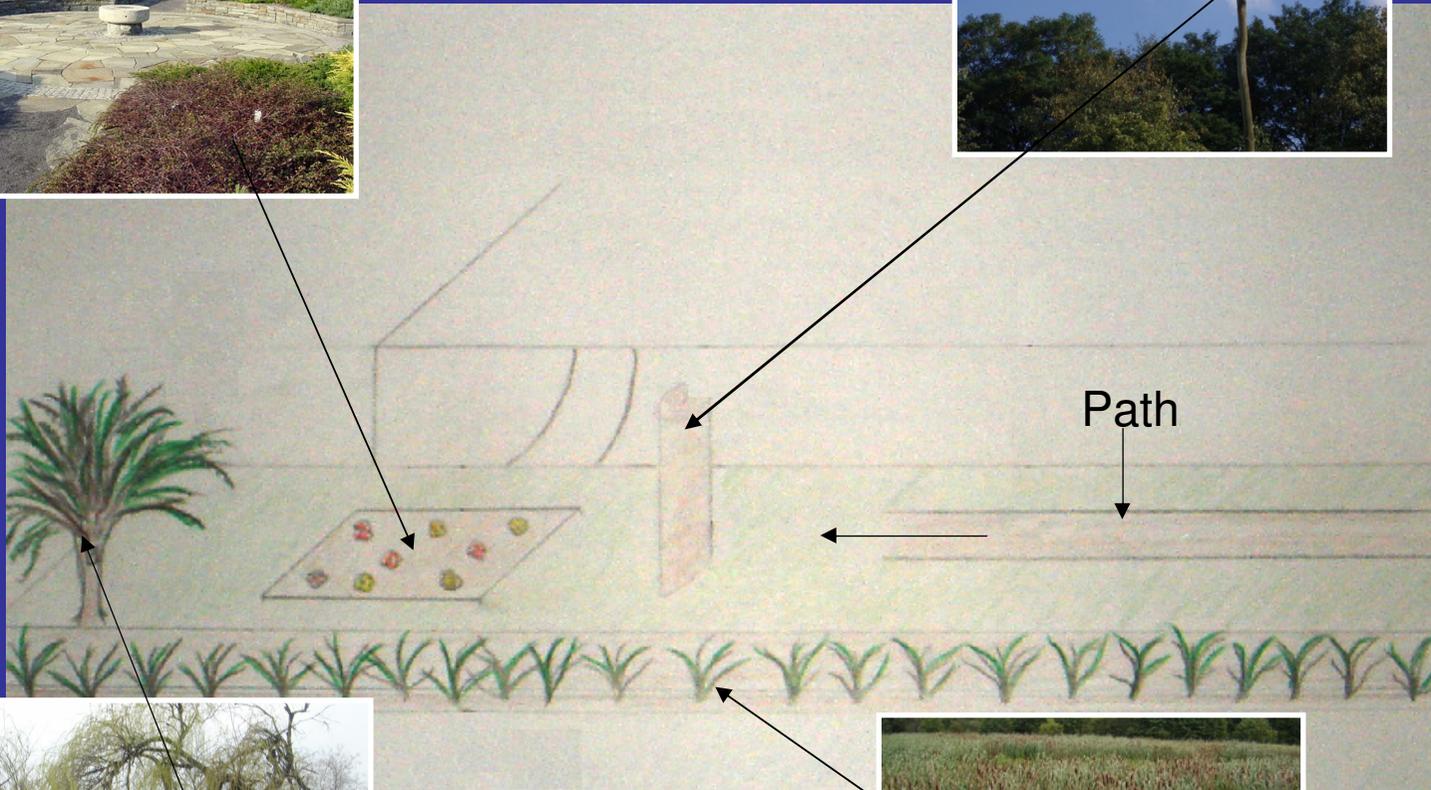

Floating platform

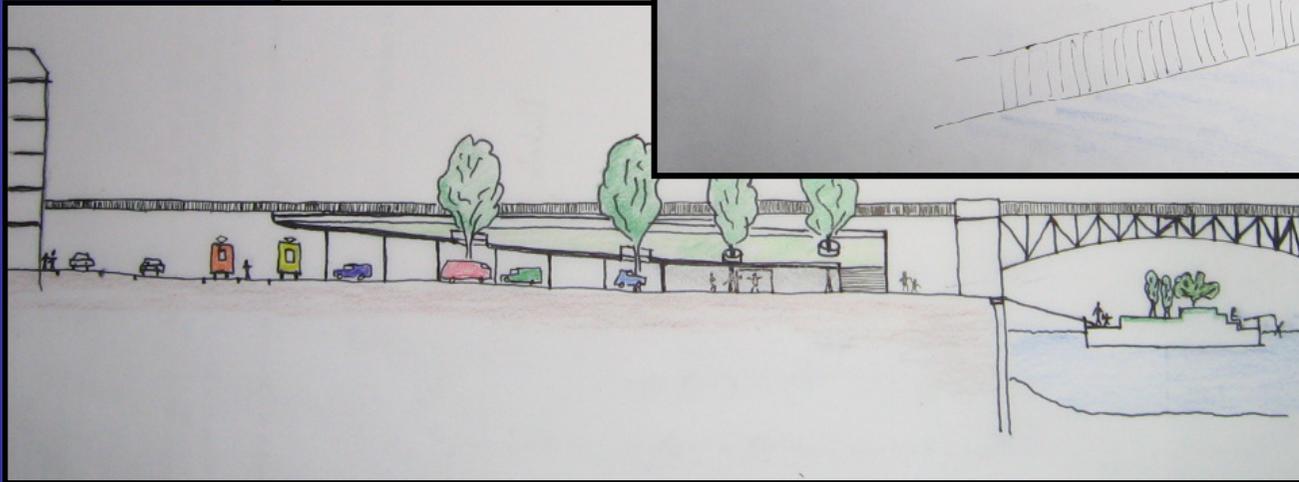

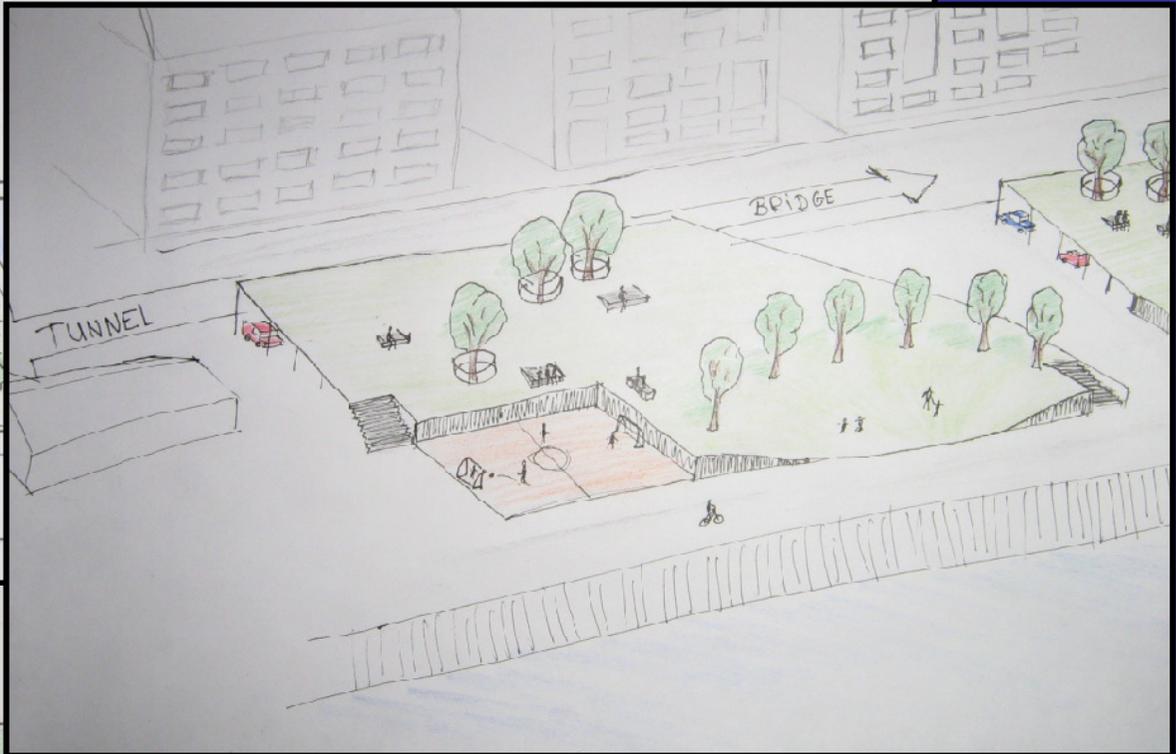

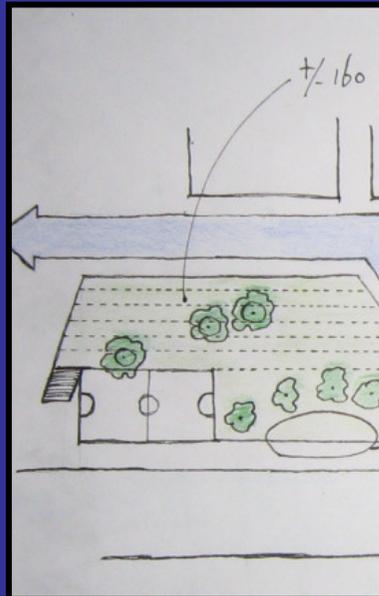

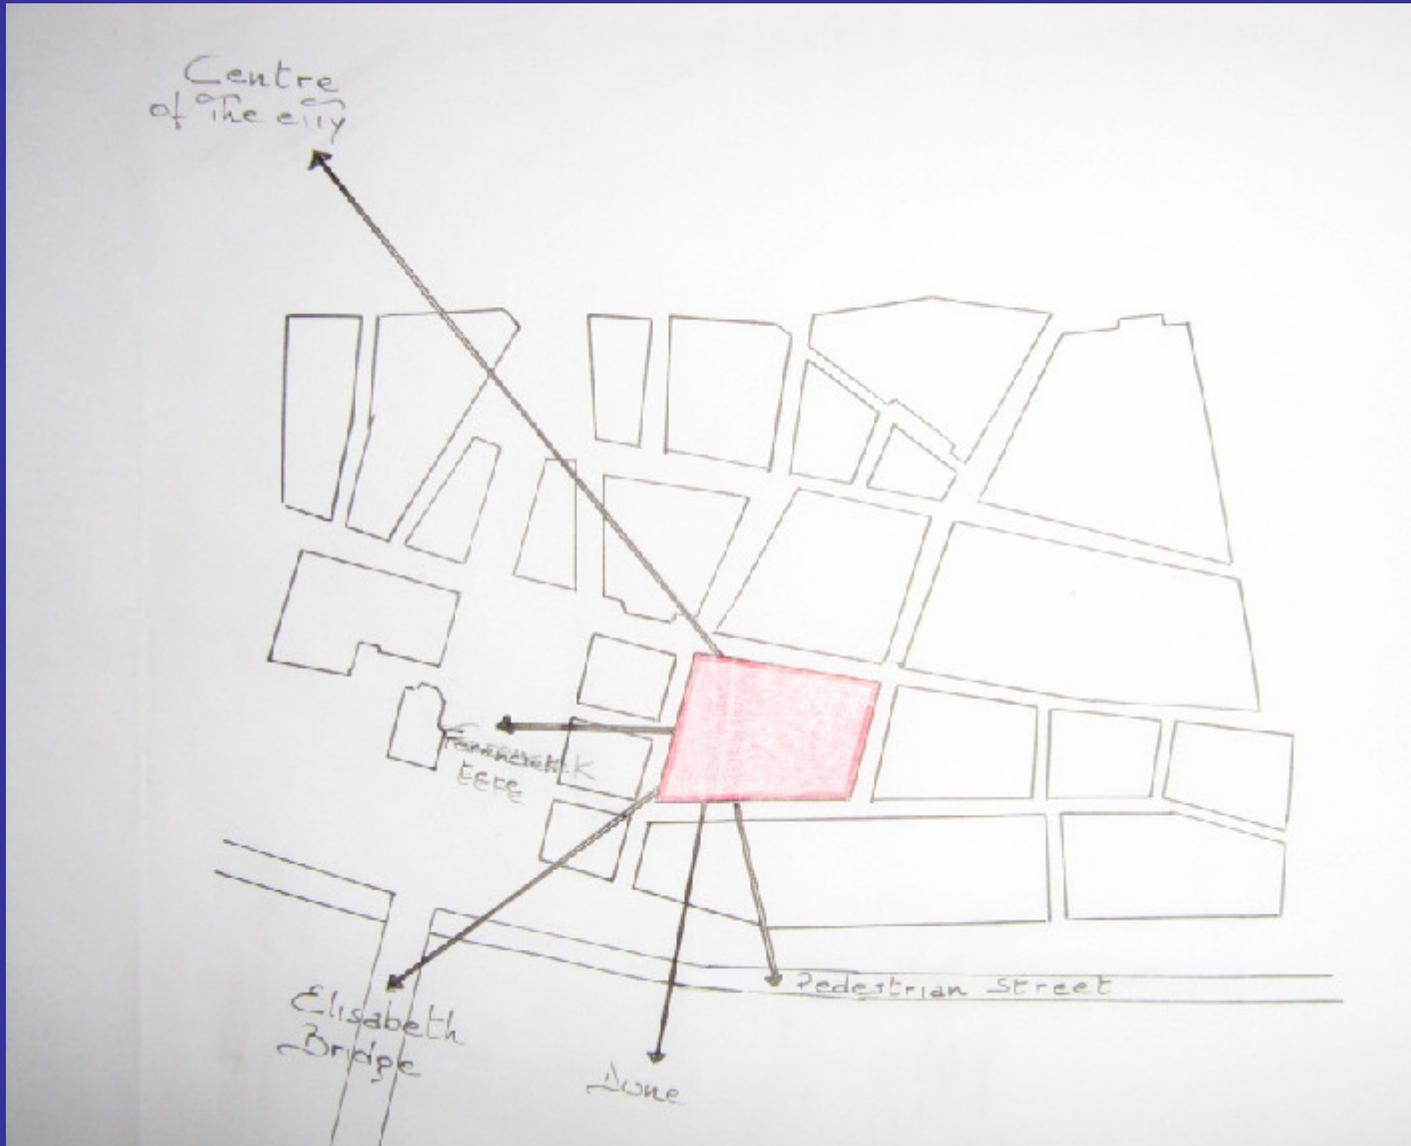

SECTION 3

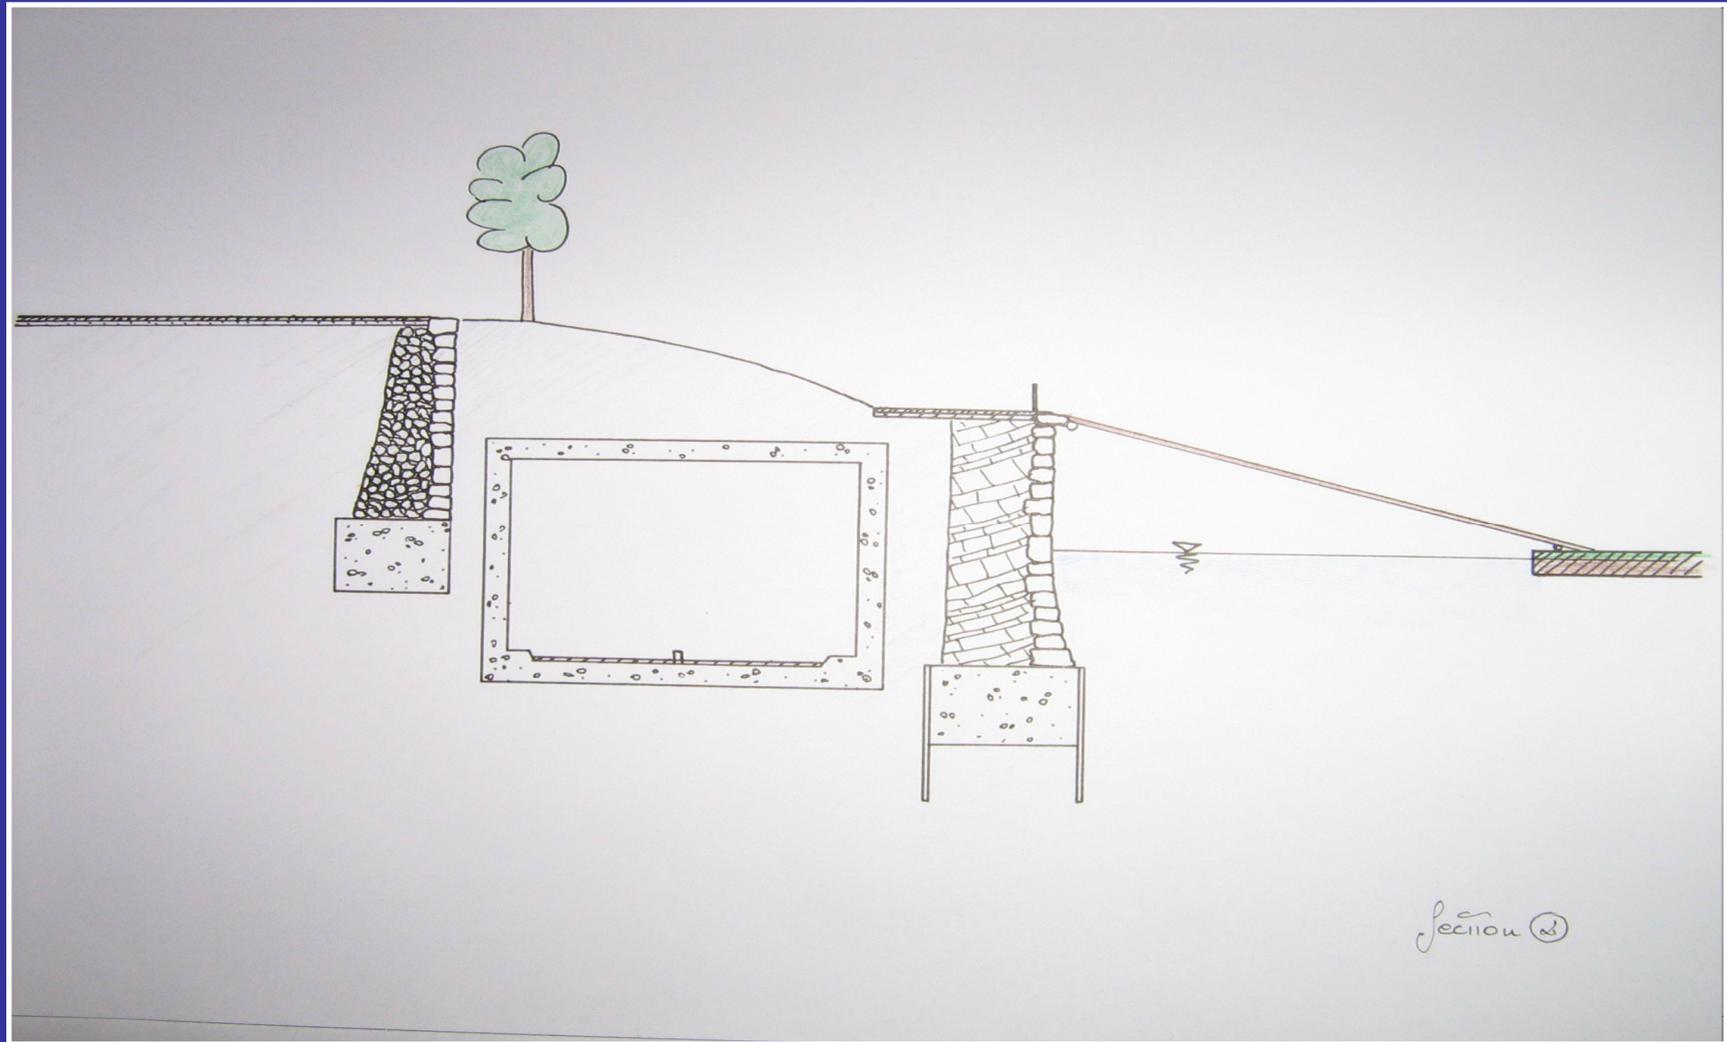

Parking

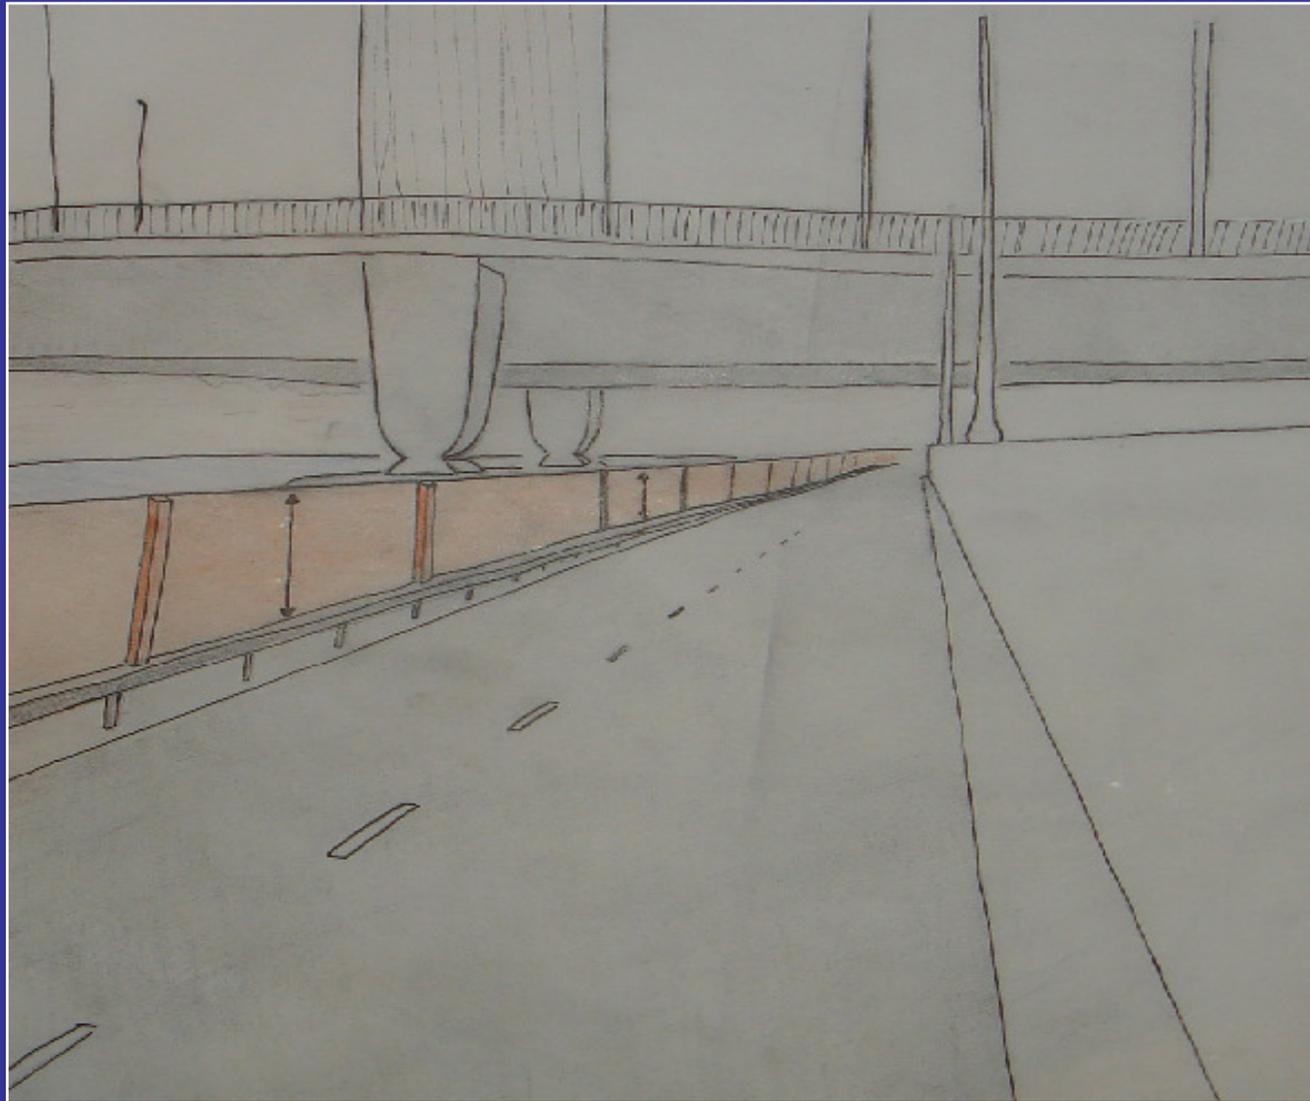

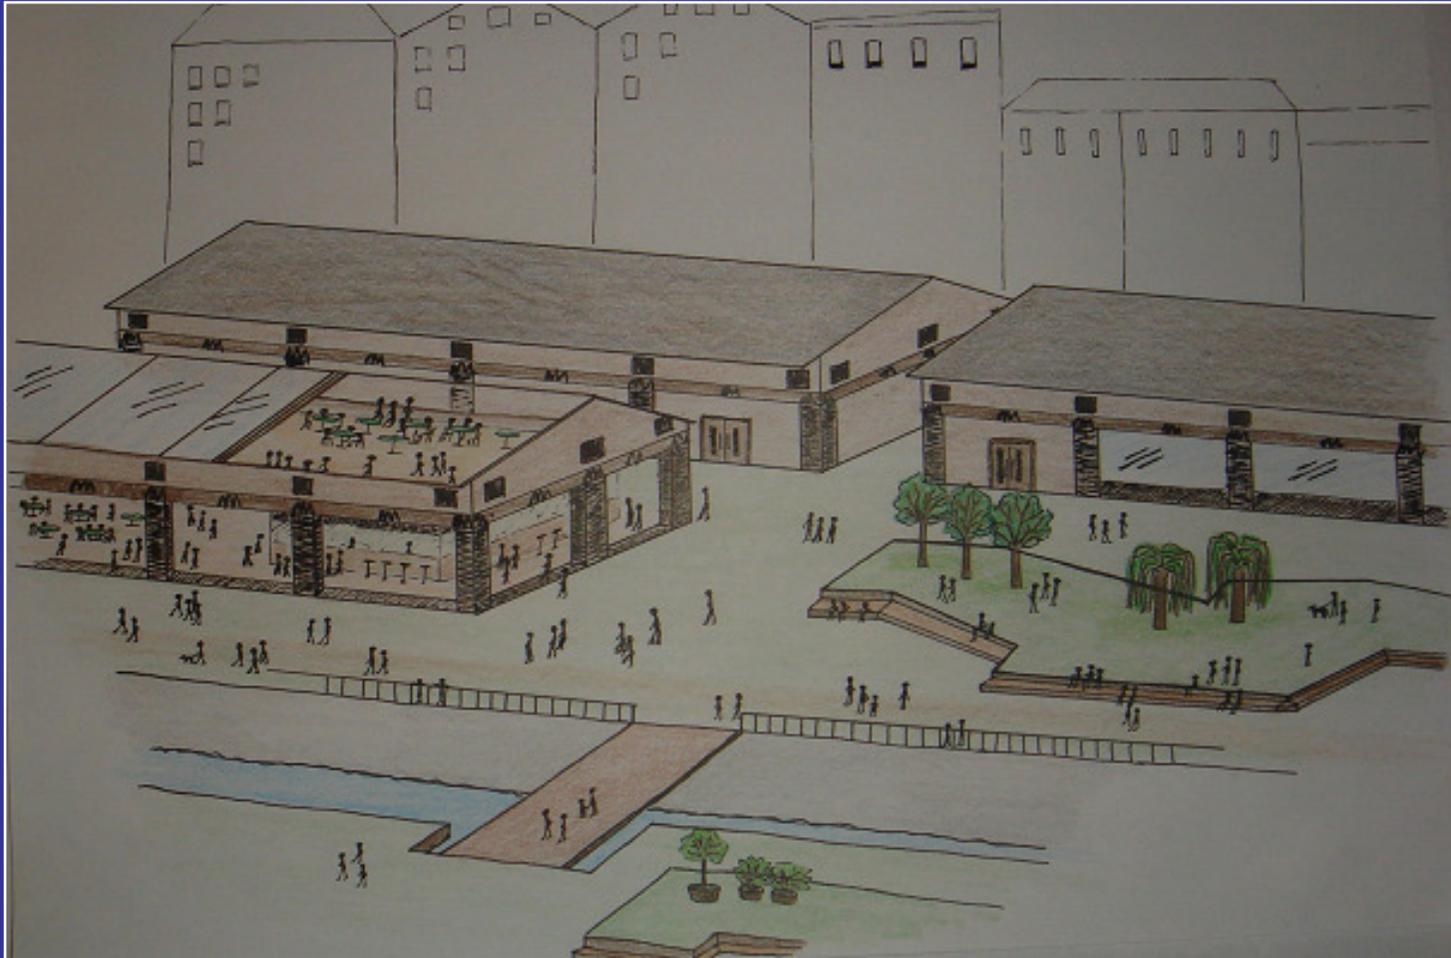

Reconstructing the transport on the side of the river

Road under Elisabeth bridge down town

New functions for the warehouses

Improved public spaces and connections

Key

Connection of green spaces

Green spaces

Cycle trails

Planting to improve green areas

- Trees on paths

- Political habitat creation

- Introduce nationally recognised plant species.

Carolina anemone

Habitat creation to improve quality of life

- Introducing rare species of plants and animals

- Educate tourists about local nature

Tourist

- Green areas and connections to the river improve the city's beauty

Conclusions

- Improve quality of life with green areas and public access.
- Solve the flooding problems to reduce congestion.
- Solve the parking problems in a green way.
- Improve the warehouses for public use.
