

Architectural Research for Exchange Students
Budapest University of Technology and Economics, Faculty of Architecture
BMEEPUI0995 2016/2017 Autumn semester

ARCHITECTURE AND PSYCHOLOGY

We will go through a range of introductory topics of the field of psychology (mainly perceptual and environmental psychology) trying to find the intersecting points of them with the field of architecture.

We will focus on design applications of research ideas. Also we are developing a method how to use designer architects' intuition as a tool for scientific research.
